

MS PHD'S Student Receives Best Poster Award

Adrienne George, a member of the MSPHD's cohort VI and a graduate student in the College of Marine Science at the University of South Florida, received a Best Poster Award at the joint 2011 Einsteins in the City (EIC 2011) International Student Research Conference/NYC LSAMP Urban University Conference Series. Adrienne presented on "Comparative Ecology of K Vent and P Vent along the East Pacific Rise."

This year's conference was held at City College of New York from April 13-15, 2011 and cohosted by the NSF New York City Louis Stokes Alliance for Minority Participation (NYC LSAMP) program.

Highlighting exemplary research from the undergraduate to the Ph.D levels, EIC2011 provides a premier forum for professional exchange among national and international student researchers, both undergraduates and graduate students. The theme of the conference was "Transcending Boundaries; Communicating Across Disciplines."

Adrienne earned her B.S. in Natural Resources/Environmental Science from Delaware State University in 2009. She is a recipient of fellowship support from the NSF Florida-Georgia Louis Stokes Alliance for Minority Participation (FGLSAMP) program.
