

STEM: Science, Technology, Engineering, and Math

New learning Community being offered for Science, Technology, Engineering, and Mathematics students at the University of Southern Maine!

EAST-2 (Eastern Alliance in Science, Technology, Engineering, and Mathematics) supports students in science, technology, engineering, and mathematics (STEM). Most recently EAST-2 is offering a STEM Learning Community to be held on the Gorham campus (Wednesdays, 5:10 - 6:30, dinner provided) starting in the spring semester. The Learning Community is for all students at all levels and will support communication with others having similar challenges, navigation of the college experience, connections with faculty, designing individual success plans, and meeting goals. Students will benefit who are wondering where their STEM major will take them, are eager to succeed in college, are looking for a supportive college network, want to improve their study skills and learn new ones, need to boost their math and science grades, want a boost in confidence. For additional information contact: Samantha Langley-Turnbaugh, Langley@usm.maine.due, 780-5361 or Pauline Mateyko, pmateyko@usm.maine.edu, 780-5785

Pauline Mateyko
